Full Episode Synopsis:

After launching his first ship for the royal navy, King Julien learns during Xixi's news briefing that only 99% of the lemurs in the kingdom approve of the job he is doing. King Julien feels crushed, and despite Maurice's attempts to comfort him and Clover's ideas to create a new law preventing public disapproval of the king, Julien sulks. After gathering the group of lemurs and asking them for the opinion on the new king, King Julien believes that Hector is the one who hates him. Julien goes to Hector's house, resulting in accidentally burning Hector's match-stick statue and angering Hector. Clover informs King Julien that it wasn't Hector who was the original 1%, and, according to Xixi, he refused to even answer the question in the first place. To win everyone's favor back, King Julien gathers all the lemurs in the kingdom to kiss their babies. This plan backfires. After a one-sided conversation with Amelia the skeleton, King Julien decides to give out free mangoes to everyone in the kingdom as "bribery". It works, until he runs out of mangoes and everyone begins to demand more. The branch cannot bear the weight of everyone on it, and falls. Julien saves a baby in the process, winning the kingdom's approval once more. Clover realizes that during her investigation, all the clues pointed to Mort. She asks him why he said that he did not like King Julien. Mort says that he does not like King Julien because he loves him. Summarized from https://madagascar.fandom.com/wiki/Poll_Position
